CLINICAL BIOMECHANICS

REVIEWER ACKNOWLEDGEMENT

Scientific publishing relies heavily on the enthusiasm and commitment of a large number of individuals, in particular the fellow scientists who give freely of their time and advice to ensure a standard of content and presentation for peer-reviewed journals. The Editors and Publishers of *Clinical Biomechanics* would like to take this opportunity of thanking the members of the Editorial Board and the following advisors for their invaluable help during 1994.

R Allen, P Cavanagh, R Cooper, A Cutts, P Dolan, J Egan, A Jennings, G Johnson, P McNair, M Morlock, S Pheasant, R Rozendal, B Seedhom, J Smeathers, C Snijders and S West.

INDEX: VOLUME 9 1994

Clin. Biomech. 1994; **9**: 381–384, November

SUBJECT INDEX

3-dimensional movement
  fracture, tibia, external fixation, displacement, 51
activities of daily living
  sit to stand, biomechanics, kinesiology, 187
activity
  foot, force, pressure, running, 130
age
  spinal shrinkage, creep, viscoelasticity, lifting, 367
anatomy
  biomechanics, trapezius, 44
ankle
  skin displacement, error, foot, 291
ankle joint fusion
  arthrodesis, subtalar joint fusion, talonavicular joint fusion, tibial rotation, 356
annular tears
  intervertebral joint, intervertebral disc, degeneration, mechanics, 211
anterior cruciate ligament transection
  meniscectomy, joint compression compliance, energy storage, contact areas, 37
anterior knee pain
  kinetics, kinematics, gait analysis, pronation, 79
aramid
  composite material, mechanical properties, fracture fixation, strain-shielding, 315
arthrodesis
  ankle joint fusion, subtalar joint fusion, talonavicular joint fusion, tibial rotation, 356
arthroplasty
  osteoarthritis, hip, gait, 162
axial vertebral rotation
  back shape analysis, (video) rasterstereography, scoliosis, spinal midline, 28
axis of rotation
  cervical vertebra, zygapophyseal joints, biomechanics, 342
back shape analysis
  (video) rasterstereography, scoliosis, spinal midline, axial vertebral rotation, 28
backrest
  sitting, posture, 323
below-knee-amputee
  prosthesis alignment, postural sway, foot–ground reaction force, 258
biomechanics
  trapezius, anatomy, 44
  patellofemoral pain syndrome, strength, synergy, 93
  sit to stand, activities of daily living, kinesiology, 187
  running, mechanics, pathomechanics, cross-over, 117
  heel cups, cushioning effect, 297
  sit-to-stand transfer, electromyography, normative data, co-contraction, 235
  glenohumeral arthrodesis, shoulder, shoulder girdle, musculoskeletal, 139
  gait, joint angle, joint force, joint moment, 245
  ribcage, stiffness, 379
  cervical vertebra, zygapophyseal joints, axis of rotation, 342
bone
  interface, prosthesis, orthopaedic, motion, 275
bone mineral density
  elastic modulus, ultimate strength, c.t. number, histomorphology, 67
  osteoporosis, thoracolumbar vertebrae, compressive strength, spinal fractures, 180
  thoracolumbar vertebrae, formalin fixation, compressive strength, 175
bone pin fixation
  cutting technology, traction pins, pull-out strength, thread cutting quality, 73
calcaneal eversion
  pronation, tibial rotation, calcaneal inversion, mechanical coupling, 349
calcaneal inversion
  pronation, tibial rotation, calcaneal eversion, mechanical coupling, 349
carpal-tunnel syndrome
  tendon biomechanics, tendinitis, 15
cervical loading
  neck stiffness, 193
cervical spine
  position, neck muscles, isometric, extensor strength, 157
cervical vertebra
  zygapophyseal joints, biomechanics, axis of rotation, 342
co-contraction
  sit-to-stand transfer, biomechanics, electromyography, normative data, 235
comfort
  insole, walking, running, pressure, 335
composite material
  aramid, mechanical properties, fracture fixation, strain-shielding, 315
composite muscle–tendon unit
  failure sites, peak tensile force, 310
compression
  cyclic loading, end-plate, fatigue failure, intervertebral disc, 132
compressive strength
  osteoporosis, thoracolumbar vertebrae, spinal fractures, bone mineral density, 180
  thoracolumbar vertebrae, formalin fixation, bone mineral density, 175
consolidation theory
  proteoglycan/collagen skeleton, osmotic pressure, transient gel state, proteoglycan removal, 149
contact areas
  meniscectomy, anterior cruciate ligament transection, joint compression compliance, energy storage, 37
creep
  spinal shrinkage, viscoelasticity, 61
  spinal shrinkage, viscoelasticity, lifting, age, 367
cross-over
  running, mechanics, biomechanics, pathomechanics, 117
c.t. number
  elastic modulus, ultimate strength, bone mineral density, histomophology, 67
cushioning effect
  heel cups, biomechanics, 297
cutting technology
  traction pins, pull-out strength, bone pin fixation, thread cutting quality, 73
cyclic loading
  compression, end-plate, fatigue failure, intervertebral disc, 132
degeneration
  intervertebral joint, intervertebral disc, annular tears, mechanics, 211
design
  prosthesis, hip, flexible, 375
disc degeneration
  glycosaminoglycan polysulphate, stature changes, 206
displacement
  fracture, tibia, external fixation, 3-dimensional movement, 51
Doppler ultrasound
  vertebral artery, stroke, manipulation, 105
dynamic
  isokinetic, isometric, shoulder flexion, static, 99
elastic modulus
  ultimate strength, bone mineral density, c.t. number, histomorphology, 67
electromyography
  sit-to-stand transfer, biomechanics, normative data, co-contraction, 235
e.m.g.
  frequency, normalization, reference value, variability, 253
end-plate
  compression, cyclic loading, fatigue failure, intervertebral disc, 132
energy storage
  meniscectomy, anterior cruciate ligament

transection, joint compression compliance, contact areas, 37
error
skin displacement, foot, ankle, 291
extensor strength
cervical spine, position, neck muscles, isometric, 157
external fixation
fracture, tibia, 3-dimensional movement, displacement, 51
external fixator
open fracture, interfragmentary screw, fracture stability, torsion, 167
failure sites
composite muscle–tendon unit, peak tensile force, 310
fatigue failure
compression, cyclic loading, end-plate, intervertebral disc, 132
fatigue fracture
stress intensity parameters, longitudinal arch, foot–ground pressure distribution, stress fracture, 111
fibular osteotomy
high tibial osteotomy, knee, varus deformity, 284
foot
force, pressure, activity, running, 130
skin displacement, error, ankle, 291
foot–ground pressure distribution
stress intensity parameters, longitudinal arch, stress fracture, fatigue fracture, 111
foot–ground reaction force
below-knee-amputee, prosthesis alignment, postural sway, 258
force
foot, pressure, activity, running, 130
formalin fixation
thoracolumbar vertebrae, compressive strength, bone mineral density, 175
fracture
tibia, external fixation, 3-dimensional movement, displacement, 51
fracture fixation
aramid, composite material, mechanical properties, strain-shielding, 315
fracture stability
open fracture, interfragmentary screw, external fixator, torsion, 167
frequency
e.m.g., normalization, reference value, variability, 253
gait
osteoarthritis, hip, arthroplasty, 162
lateral collateral ligament, 220
biomechanics, joint angle, joint force, joint moment, 245
gait analysis
anterior knee pain, kinetics, kinematics, pronation, 79
glenohumeral arthrodesis
shoulder, shoulder girdle, biomechanics, musculoskeletal, 139
glycosaminoglycan polysulphate
disc degeneration, stature changes, 206
ground reaction force
total condylar knee arthroplasty, moment, 125
health-risk
lumbar spine compression, shock, 263
heel cups
cushioning effect, biomechanics, 297
high tibial osteotomy
fibular osteotomy, knee, varus deformity, 284
hip
osteoarthritis, arthroplasty, gait, 162
prosthesis, design, flexible, 375
hip joint
orthoses, Legg–Perthes, joint load, measurement, 225
histomorphology
elastic modulus, ultimate strength, bone mineral density, c.t. number, 67
inhibition
quadriceps femoris, strength, swelling, neural, 331
injury
posture, lumbar spine, mechanical loading, intervertebral disc, 5
insole
comfort, walking, running, pressure, 335
interface
bone, prosthesis, orthopaedic, motion, 275
interfragmentary screw
open fracture, external fixator, fracture stability, torsion, 167
intervertebral disc
compression, cyclic loading, end-plate, fatigue failure, 132
intervertebral joint, annular tears, degeneration, mechanics, 211
posture, lumbar spine, mechanical loading, injury, 5
intervertebral joint
intervertebral disc, annular tears, degeneration, mechanics, 211
isokinetic
isometric, shoulder flexion, dynamic, static, 99
isometric
isokinetic, shoulder flexion, dynamic, static, 99
cervical spine, position, neck muscles, extensor strength, 157
joint angle
biomechanics, gait, joint force, joint moment, 245
joint compression compliance
meniscectomy, anterior cruciate ligament transection, energy storage, contact areas, 37
joint force
biomechanics, gait, joint angle, joint moment, 245
joint load
orthoses, hip joint, Legg–Perthes, measurement, 225
joint moment
biomechanics, gait, joint angle, joint force, 245
kinematics
kinetics, power, standing up, low back pain, 85
anterior knee pain, kinetics, gait analysis, pronation, 79
posture, scoliotics, 303
wrist joint, radiotriquetral ligaments, torsions, 362
kinesiology
sit to stand, activities of daily living, biomechanics, 187
kinetics
kinematics, power, standing up, low back pain, 85
anterior knee pain, kinematics, gait analysis, pronation, 79
knee
prosthesis, movement, osteoarthritis, screening, 199
high tibial osteotomy, fibular osteotomy, varus deformity, 284
lateral collateral ligament
gait, 220
Legg–Perthes
orthoses, hip joint, joint load, measurement, 225
lifting
spinal shrinkage, creep, viscoelasticity, age, 367
longitudinal arch
stress intensity parameters, foot–ground pressure distribution, stress fracture, fatigue fracture, 111
low back pain
kinematics, kinetics, power, standing up, 85
lower leg tremor
spring loading, muscle length, 203
lumbar spine
posture, mechanical loading, injury, intervertebral disc, 5
lumbar spine compression
health-risk, shock, 263
manipulation
vertebral artery, doppler ultrasound, stroke, 105
measurement
orthoses, hip joint, Legg–Perthes, joint load, 225
mechanical coupling
pronation, tibial rotation, calcaneal eversion, calcaneal inversion, 349
mechanical loading
posture, lumbar spine, injury, intervertebral disc, 5
mechanical properties
aramid, composite material, fracture fixation, strain-shielding, 315
mechanics
running, biomechanics, pathomechanics, cross-over, 117
intervertebral joint, intervertebral disc, annular tears, degeneration, 211
meniscectomy
anterior cruciate ligament transection, joint compression compliance, energy storage, contact areas, 37
moment
total condylar knee arthroplasty, ground reaction force, 125
motion
bone, interface, prosthesis, orthopaedic, 275
movement
knee, prosthesis, osteoarthritis, screening, 199
muscle length
lower leg tremor, spring loading, 203
muscles
shoulder, insufficiency, range of motion, flexibility, 377
musculoskeletal
glenohumeral arthrodesis, shoulder, shoulder girdle, biomechanics, 139
neck muscles
cervical spine, position, isometric, extensor strength, 157
neck stiffness
cervical loading, 193
neural
quadriceps femoris, strength, swelling, inhibition, 331
normalization
e.m.g., frequency, reference value, variability, 253
normative data
sit-to-stand transfer, biomechanics, electromyography, co-contraction, 235
open fracture
interfragmentary screw, external fixator, fracture stability, torsion, 167
orthopaedic
bone, interface, prosthesis, motion, 275
orthoses
hip joint, Legg–Perthes, joint load, measurement, 225
osmotic pressure
consolidation theory, proteoglycan/collagen skeleton, transient gel state, proteoglycan removal, 149
osteoarthritis
knee, prosthesis, movement, screening, 199
hip, arthroplasty, gait, 162
osteoporosis
thoracolumbar vertebrae, compressive strength, spinal fractures, bone mineral density, 180
patellofemoral pain syndrome
strength, synergy, biomechanics, 93
pathomechanics
running, mechanics, biomechanics, cross-over, 117
peak tensile force
composite muscle–tendon unit, failure sites, 310
position
cervical spine, neck muscles, isometric, extensor strength, 157
postural sway
below-knee-amputee, prosthesis alignment, foot–ground reaction force, 258
posture
lumbar spine, mechanical loading, injury, intervertebral disc, 5
sitting, backrest, 323
kinematics, scoliotics, 303
power
kinematics, kinetics, standing up, low back pain, 85
pressure
foot, force, activity, running, 130
comfort, insole, walking, running, 335
pronation
anterior knee pain, kinetics, kinematics, gait analysis, 79
tibial rotation, calcaneal eversion, calcaneal inversion, mechanical coupling, 349

prostheses alignment
below-knee-amputee, postural sway, foot–ground reaction force, 258
prosthesis
knee, movement, osteoarthritis, screening, 199
bone, interface, orthopaedic, motion, 275
design, flexible, hip, 375
proteoglycan removal
consolidation theory, proteoglycan/collagen skeleton, osmotic pressure, transient gel state, 149
proteoglycan/collagen skeleton
consolidation theory, osmotic pressure, transient gel state, proteoglycan removal, 149
pull-out strength
cutting technology, traction pins, bone pin fixation, thread cutting quality, 73
quadriceps femoris
strength, swelling, inhibition, neural, 331
radiotriquetral ligaments
wrist joints, kinematics, torsions, 362
reference value
e.m.g., frequency, normalization, variability, 253
ribcage
biomechanics, stiffness, 379
running
foot, force, pressure, activity, 130
